# intelliCompute

Where partnerships mean success...

At intelliCompute, we are in the business of making technology accessible. Accessible to those people that matter. For, in an ever-changing and dynamic world of business, technology adoption is intrinsically linked to business success.

## Our Company

The convergence of Information & Communication Technologies (ICT) and the whole new gamut of opportunities it offers to businesses fascinates one and all. This passion is what drives us to venture into niche areas of ICT.

We are a team of professionals with proven expertise in our domain of operations. Our demonstrable success stories include :

- ❖ Roll out of a Business Intelligence Centre of Excellence in a large Technology MNC.
- ❖ Implementation of a Reporting & Analytics solution for an Entertainment major.
- ❖ Implementation of Executive level Dashboard solution for a Metal Manufacturer.
- ❖ Operational metrics widget on desktop for a Retail store
- ❖ Development/Deployment of a mobile application for a Pharmaceutical company.
- ❖ Training programs on BI tools to MNC's

We bring this vast experience while working on new assignments with you.

## Our Services

Our Services portfolio in the ICT domain is designed and executed so as to deliver high returns on customer investments. Our customer engagement model is built on this very premise – demonstrable and quantifiable ROI.

### Business Intelligence

We provide consulting services in Data Management, Reporting & Analytics function that enable our customers gain better insights into their businesses. For, better insights lead to better decisions.

Our service offering extends into Data Integration, Metadata layer, Operational Reporting, Analytical Reporting and Performance Management; thereby enabling an end-to-end BI oriented solution.

If you are a company looking for a BI solution or planning to replace an existing solution, or having a solution that you intend to partner with, for further development, training and support, then we are eager to work with you.

# intelliCompute

## SAP Services

As part of our SAP services offering, we provide consulting services in SAP PI (formerly called as SAP XI), SAP CE to handle complex integration requirements between SAP and non-SAP applications. We have an expert team in handling Business Process Modeling (BPM) and defining business rules with BRM component of SAP CE. With the help of these tools we can orchestrate different SAP and non-SAP components for smooth flow of data for a given business process.

We also provide testing, verification and support services in SAP PI and SAP CE areas for better maintenance and reliable productive systems.

## Application Development

At intelliCompute, you have access to a set of highly talented development professionals in technology platforms not limited to .NET, Java and Adobe Flex among others.

## Mobile Development

Mobile applications represent the next wave of technology-enabled unified communications. In this emerging domain, we offer skilled resources in order to develop applications based on existing mobile operating systems and interfaces.

Our mobile applications are intended to enable our customers reap the benefits of mobility like instant access and availability, location based services, over-the-air integration with other systems etc.

## Technologies

| Business Intelligence   | Application Development  | Mobile Development  | SAP  |
|---|--|---|--|
| <ul style="list-style-type: none"><li>&gt; SAP Business Objects</li><li>&gt; IBM Cognos</li><li>&gt; Informatica</li><li>&gt; IBM Datastage</li><li>&gt; Oracle BI</li><li>&gt; Klipfolio</li></ul> | <ul style="list-style-type: none"><li>&gt; NET</li><li>&gt; Java</li><li>&gt; Adobe Flex</li></ul> | <ul style="list-style-type: none"><li>&gt; Google Android</li><li>&gt; Nokia QT</li><li>&gt; Windows CE</li><li>&gt; Blackberry</li><li>&gt; iPhone</li></ul> | <ul style="list-style-type: none"><li>&gt; SAP NetWeaver</li><li>&gt; SAP Process Integration</li><li>&gt; SAP Business Intelligence</li></ul> |

## Our Product

Having successfully realized multiple BI implementations, it has been our observation that critical success factors in BI strategy include :

- ❖ Minimal time from design to deployment
- ❖ Start using it, not having to learn using it
- ❖ Ease and flexibility of use

Keeping these factors in view and leveraging quality development resources at our command, we developed a robust, easy to deploy and ready to use BI application. CRS or Collaborative Reporting Solutions, as the name suggests is an end-to-end reporting and analytics tool that helps provide insightful reports/dashboards to end-users.

CRS has features that support day to day operational reporting and has capabilities of analytical ad-hoc reporting and dashboards. It has the in-built capability of combining database from multiple sources and also present data from web services.
